## Datasheet

# CM-WALL-C-3

Horizontal Wall Mount Version 3 for Cisco Access Points https://wifighter.shop/en/CM-WALL-C-3

#### **Application**

The horizontal wall mount allows access points to be installed horizontally on a vertical surface (e.g., walls).

This ensures optimal use of the AP's antenna characteristics and is particularly useful when ceilings are too high or cannot be used for mounting.

#### **Benefits**

- Allows horizontal installation of access points on walls
- Clean, professional appearance suitable for visible and hygienically sensitive environments
- Mounting hole pattern matches the original Cisco mount for easy replacement

#### Compatibility

• Compatible with Cisco access points starting from the AP1040 series (approx. 2009)

#### Material, Farbe und Herkunft

- Powder-coated sheet metal (RAL 9010)
- Designed & made in Hamburg

### Kurzanleitung

- Fasten the horizontal wall mount to the wall
- Insert the access point into the mount
- Secure the access point in place
