Combined Mount Version 3 for Cisco Access Points and Patch Antennas
https://wifighter.shop/en/CM-APANT-C-3

## Application

The combined mount for Cisco Access Points and patch antennas enables space-saving installation of Cisco Access Points with external patch antennas on walls or ceilings.

## Advantages

• Front section with antenna is adjustable (±15° to ±30°)

• Mounting on wall or ceiling

## Compatibility

• Compatible APs: Cisco from AP1040 (approx. 2009)

• Compatible antennas: Cisco AIR-ANT2566P4W-R and antennas with the same mounting-hole dimensions

## Material, Color & Origin

• Powder-coated sheet metal (RAL 9010)

• Designed & made in Hamburg

## Quick Guide

• Fasten the mount to the wall or ceiling

• Insert the access point and secure it in place

• Install the antenna on the front plate and connect the cables

• Adjust the antenna angle
