

CM-SURV-1

WiFIGHTER MOUNT - mobile mounting solution for surveys and events
<https://wifighter.shop/en/CM-SURV-1>

Application Area

The WiFIGHTER MOUNT enables fast and secure mounting of various access points onto tripods with a 1/4" camera thread. It is ideal for AP-on-a-Stick (APoS) surveys, temporary Wi-Fi deployments, and use at trade shows, events, and mobile work environments.

Advantages

- the WiFIGHTER MOUNT can be easily disassembled and stored flat for transport
- direct mounting of Aruba access points of the 500, 600, and 700 series without additional brackets
- compatible with Cisco T-Rail mounts
- compatible with many additional AP models from other manufacturers
- optionally available with custom company branding or logo

Material, Color and Origin

- Material Frame & Bracket: ASA (UV-resistant, durable, weatherproof)
- Material Rails & Tripod Adapter: stainless steel
- Standard color black, additional colors available on request
- designed & made in Hamburg

Quick Instructions

- mount the WiFIGHTER MOUNT onto the tripod using the 1/4" camera thread
- slide the bracket and frame of the WiFIGHTER MOUNT together
- attach the access point directly to the stainless-steel rails or secure a compatible T-Rail/Odenwald ceiling mount
- optionally attach additional accessories using the designated mounting points
