

## CM-WALL-JM-3

Horizontal Wall Mount Version 3 for Juniper Mist Access Points  
<https://wifighter.shop/en/CM-WALL-JM-3>

### Application

The horizontal wall mount allows access points to be installed horizontally on a vertical surface (e.g., walls). This enables optimal use of the AP's antenna characteristics.

It is also useful when ceilings are too high or cannot be used for mounting.

### Benefits

- Allows horizontal installation of access points on walls
- Clean, professional appearance suitable for visible and hygienically sensitive environments

### Compatibility

- Compatible with Juniper Mist access points such as AP34, AP41, AP43, AP45
- Compatible with Cisco access points starting from the AP1040 series (approx. 2009)

### Material, Color & Origin

- Powder-coated sheet metal (RAL 9010)
- Designed & made in Hamburg

### Kurzanleitung

- Fasten the horizontal wall mount to the wall
- Slide the access point into the horizontal wall mount
- Secure the access point in place
