

# netool.io<sup>Pro</sup>

Network automation in your pocket

Feature	Standard	Pro
LLDP/CDP/EDP/FDP/SONMP – Port, Switch, VLAN detection	■	■
EAP Detection	■	■
Tagged VLAN ID detection	■	■
DHCP Testing – IPv4, DNS, Subnet, DHCP server, DHCP options	■	■
DHCP IPv6	■	■
Spanning-tree detection and analyze	■	■
LACP detection	■	■
Ping internet test	■	■
Ping gateway test	■	■
Ping Switch management test	■	■
Ping custom location test	■	■
HTTP/HTTPS Check	■	■
Traceroute		■
Public IP detection	■	■
PCAP capture	■	■
PCAP Convert to text and download	■	■
PCAP Download to device		■
netool.cloud – for basic discovery info only	■	■
802.1X client mode	■	■
ARP Scan	■	■
Port scan of ARP results	■	■
Save main discovery to history	■	■
Auto save of history	■	■
CSV export of history	■	■
Share discovery via text – Email, message, slack etc...	■	■
Dark Mode	■	■
Untagged/Access port auto configuration via SSH		■
Tagged VLAN and Native VLAN auto configuration via SSH		■
Custom IF/THEN configuration templates via SSH		■
IF/THEN keys – Discovered port, queued port		■
Auto Queue switch configuration change		■
Auto configure via queue		■
Auto configure on plugin using IF/THEN template		■
Configuration change history		■
SSH log session per configuration history entry		■
SSH credential database		■
Import and Export of SSH credentials – Encrypted with AES 125 and passphrase.		■
Per switch credential permissions – Limit to VLAN id, disable LOG, disable IF/THEN.		■
Import and export of IF/THEN statements		■
CSV export of SSH history or queue		■
